SPECIFICATION AMENDMENTS

Please replace the paragraph beginning on page 11 line 1 with the following replacement paragraph.

If a successful WAN connection was established by the PNAD, (block 355), both data and/or voice may be communicated via the PNAD which may then communicate with the embedded device via a two-way communications link. If a successful WAN connection was established by the embedded device (block [[355]] 365), both data and/or voice may be communicated via the embedded communication device."

No new matter has been added with the amendment to the specification, said amendment being made solely to correct a typographical error, and not to avoid any reference.
